Open Innovation in Pharmaceutical R&D

Abstract

Lilly's number one priority is to increase the flow of innovative therapies that make a real difference for patients across multiple disease indications. Lilly has a long history of developing innovative medicines in collaboration with academia and biotechnology companies. Lilly Research Laboratories is exploring innovative approaches to improve success rates of future drug discovery and development efforts. This presentation will focus on Lilly's Open Innovation Drug Discovery effort to expand our discovery organization through access to external global scientific talent, assets and resources.
